

AWE 201 - MEDIA ARTS

GR. 10 OPEN LEVEL

COURSE OUTLINE

TEACHER: MS. BONOFILIO
ROOM: 211

DESCRIPTION

This course emphasizes the development of the knowledge and skills required for the production of media art works (eg. Graphic arts, digital design, computer animation and sound). Students will develop an appreciation of the history of media arts through analyzing specific works, and will create media art works using a variety of technologies (eg. digital camera, photo-imaging software, computer-modeling software).

CONNECTION TO CATHOLIC FAITH

This course will help students address the Ontario Catholic Graduate Expectation that they become effective communicators who use and integrate the Catholic faith tradition in the critical analysis of the arts, media, technology and information systems to enhance the quality of life.

STRANDS AND EXPECTATIONS

CREATING AND PRESENTING

- A1. The Creative Process: apply the creative process to create a variety of artworks, individually and/or collaboratively;
- A2. The Elements and Principles of Design: apply the elements and principles of design to create art works for the purpose of self-expression and to communicate ideas, information, and/or messages;
- A3. Production and Presentation: produce art works, using a variety of media/materials and traditional and emerging technologies, tools, and techniques, and demonstrate an understanding of a variety of ways of presenting their works and the works of others.

REFLECTING, RESPONDING, AND ANALYSING

- B1. The Critical Analysis Process: demonstrate an understanding of the critical analysis process by examining, interpreting, evaluating, and reflecting on various art works;
- B2. Art, Society, and Values: demonstrate an understanding of how art works reflect the societies in which they were created, and how they can affect both social and personal values;
- B3. Connections Beyond the Classroom: describe opportunities and requirements for continued engagement in visual arts.

FOUNDATIONS

- C1. Terminology: demonstrate an understanding of, and use correct terminology when referring to, elements, principles, and other components related to visual arts;
- C2. Conventions and Techniques: demonstrate an understanding of conventions and techniques used in the creation of visual art works;
- C3. Responsible Practices: demonstrate an understanding of responsible practices in visual arts.

TIMELINE**UNITS OR TOPICS OF STUDY**

10 HRS

Unit 1 - THE DIGITAL IMAGE: A PRIMER IN MEDIA ARTS

This first unit will examine the concepts behind the production of imagery in the digital age. We will examine how the image can also be manipulated and disseminated in many different ways. The elements of Art and Design will also be discussed in this introductory survey.

10 HRS

Unit 2 - PHOTOSHOP CS6 & IMAGE MANIPULATION

This second unit will introduce the students to Adobe Photoshop - the industry's leading image manipulation software. For this unit, the students will learn the interface basics. Basic cropping and extraction techniques will also be covered as well as layers, blend modes, colour channels and textures.

10 HRS

In-Class Project 1 - YOUR FUTURE VISION

For the first in-class project, students will be introduced to the concept of compositing. In layman's terms, compositing in digital terms means an artist is using a variety of digital image sources and combines them using cropping, masking and other separation techniques. This project is considered to be a variant of digital collaging

20 HRS

Media Literacy - ARE WE STILL PRIVATE?

Studying the development of Media Arts is critical to the understanding of how media affects us in so many ways. Media Literacy may be spread out throughout the semester. A first semester test & final exam includes everything studied from and discussed in class.

10 HRS

Unit 3 - ILLUSTRATOR CS6 AND CREATING VECTOR ART

This third unit will introduce students to Adobe Illustrator and Vector graphics. As a completely different tool from Photoshop (manipulation), the students will learn about Illustrator's interface as well as the basics of the program. Students will also learn how to create basic shapes and ultimately will learn how to use the pen-tool.

20 HRS

In-Class Project 2 - VECTOR STILL-LIFE (AFTER JEREMY BOOTH)

For the second in-class project, students will be introduced to the concept of creating vector using Adobe Illustrator. Along with creating shapes and hard-edged graphics, students will also be introduced to digital colour theory (using and applying Adobe Color swatches).

10 HRS

Unit 4 - VECTOR AND BITMAP GRAPHICS - THE NEW WORLD OF ILLUSTRATION

This fourth unit will combine the use of both Photoshop and Illustrator to create a cross-platform work of art. Students will also be introduced to hand-drawn digital graphics through the use of a WACOM pen tablet, as well as scanning found graphics and textures.
